Job Description

RateGain, Noida, India

My role here was to understand project requirements, coordinate with resources and direct the projects in the right direction in a timely manner. Identify strengths and weaknesses of team members and suitably make changes if required. I was guiding the team through the development, testing and implementation stages and review the completed work effectively. Providing direction and technical expertise in design, development and systems integration. I also did performance evaluation of team members. Architect all the products of RateGain applications using Angular & Material. Done the performance optimization. Used HTML5, CSS3, JavaScript, Angular, JSON, Jira, SVN & Git. Followed Agile methodology.

Emaadhyam, Gurugram, India

I was working as an offshore coordinator and Project Lead for Emaadhyam projects. Responsible for all offshore work with quality and timely deliverable. Other major responsibilities are team management, provide technical support to team whenever required, Client Meetings, Daily calls, Manage weekly & daily scrums, project sprints. Keep tracking of projects and deliverable using Atlassian 'JIRA' tool based on Agile methodology. I was responsible for requirement gathering, client meetings; manage project sprint & scrums, with offshore deliverable at client end.

Developed in-house product 'BIGVYOR' for arts & crafts lover. It was a social networking & e-commerce platform. Used technologies/tools was HTML, CSS, JavaScript, JQuery, Magento, Joomla, WordPress, PHP, MySQL, Jira, SVN, Git.

Times Internet Limited, Gurugram, India

Developed multiple Shopping Portals starting from requirement gathering from business/product team to finalizing the front-end functionality & workflow. Worked on in-house projects transforming from pearl to Java. Worked on JSP pages. Other technologies which I used to development here was HTML, CSS, Ajax, JSON, JQuery, PHP, MySql, WordPress, Magento & SVN.

Yatra, Gurugram, India

Developed new user facing features, Built reusable code and libraries for future use. Ensured the technical feasibility of UI/UX designs. Optimized application for maximum speed and scalability. Assured that all user input is validated before submitting to back end. Collaborated with other team members and stakeholders. Worked while tech transformation from pearl to java happened. Worked closely with them to produce high quality & optimized applications. HTML, CSS, JavaScript, JSP, JQuery & SVN was the main tools used here.

Travelguru

Travelguru introduced me to the IT industries. I learn all the tools used in UI Development here like HTML, CSS, JavaScript, JQuery, Ajax, JSON, XML, JSP. Worked closely with Java developers to integrate HTML on JSP pages. Worked on Flash, Dreamweaver, FrontPage. Transform the pages from table based to div based. Learnt performance optimization tricks here. Implemented sprite images to optimize http request.
